Catalogue Design by

Welcome

Dear fellow sheep breeders

We are proud of the quality of the 160 rams we will present for sale. They are backed by 46 years of stud breeding experience, plus rigid testing within our own commercial breeding program.

This year we will sell the 18 Selected Stud Ewes after the 8 Stud Rams following feedback from our stud clients. Following the ewes, the sale will proceed with 12 Selected Rams leading into the Flock ram offering. The aim is to give both Stud and Flock Ram purchasers every opportunity to find their requirements. The quality of the rams and ewes on offer continues through right to the last lot.

We invite your inspection and encourage your feedback and honest assessment of our Coolawang Border Leicesters. We look forward to catching up with you and answering any queries you may have on our stock.

The James Family

MANAGEMENT OF YOUR NEW RAM

We have done our best to present the best of our annual draft of naturally reared, structurally sound rams for your selection. We undertake a program to provide sheep sold from this property free from Brucellosis and Ovine Johnes Disease. Rams are treated with Extinosad at shearing. Rams were vaccinated with Virbac Multimin to aid in the rams development as a productive sire.

From now on his management is very much your concern and will influence what his productive life will be in your breeding program. We wish you every success with your purchase, and being personally interested in his future we suggest;

That you insure your ram(s) for the next six months. He will be more susceptible to injury, death and loss of use in this time, than in any other period in his lifetime.

Place him in a secure paddock away from other rams and unjoined females until mating. Be aware that Brucellosis can be transmitted to rams from recently joined females, as well as sexually active males.

Border Leicester Rams are sold with at least three months wool to show fleece quality to a purchaser. Depending on your mating time shearing should be considered as rams work better with shorter wool. Flystrike and grass seed problems would be minimised.

Do not overwork him in his first season. Preferably put him with older ewes.

After use, treat him well. He is your investment for future years.

Maintain a drench and vaccination (Glanery 7 in 1) program. Provide good nutrition and regular physical examinations to help ensure a long productive life.

COOLAWANG DRENCH RESISTANCE STATUS

Last year we were able to undergo another drench resistance trial. Over the last few year there has been attempts made however low counts have not made it possible to complete trials.

This years trial showed some reduction in efficacy for Whites, Abamectin and Moxidectin for *Ostertagia*. Numbers of *Trichostrongylus* and *Haemonchus* have been too low to retest in recent years. Previous results indicate very high efficacy of all drench classes against these worm species. A drench is still regarded as effective if it achieves a 95% reduction in faecal egg counts.

This year WEC samples provided enough epg to obtain a comparison suitable to be included in a current ASBV. These results are available if required.

I wish to acknowledge the efforts and assistance that Colin Andrews of Elanco has given us over the years in understanding and maintaining our drench program. For assistance Colin can be contacted on 0429 000 786.

Understanding Lambplan FEC (or WEC) ASBVs.

Please refer to the Percentile Bands page to see the WEC ASBV values which will alter over time.

HEALTH STATUS

Brucellosis Accredited No: 589 - Expiry: 31st December 2028

Ovine Johnes Disease MAP MN3V No: S263 - Expiry: 27th July 2027

Our current status is MAP MN3V. Our intention is to provide the highest possible standards for the purchasers of Coolawang rams. We remain committed to the MAP with Gudair vaccination also part of our program.

The rams were shorn on the 30th June and were vaccinated with Glanery 7 in 1 B12 and were also treated with Extinosad. All sale rams will be given another 6 in 1 and a Multimin prior to sale. The drench program will also include a Zolvic Plus drench prior to sale.

NUTRITIONAL MANAGEMENT OF YOUR NEW RAM

We encourage purchasers of stud and flock rams to discuss the post sale management of your new ram's nutrition with us.

Should their diet include hay or grain we believe that a protein level should not exceed 12% and a level closer to 10% would be better.

Good quality cereal have will provide enough roughage especially when a 100 grams of lupins every other day is included in the ration.

Over feeding with a high protein diet can lead to lower semen quality and can result in infertility which can take at least six weeks and quite often longer to reverse.

Adequate shade prior to and including mating also assists in maintaining semen quality. An extended period of heat (ie a week in the high 30s) can also reduce semen quality.

As well as diet the shedding of stud rams can also provide a risk to semen quality if ventilation is poor and especially if there is a build up of manure below grating. Excessive ammonia buildup has the same effect on semen quality as high protein diets.

ASBV INFORMATION

This year we will continue to use ASBV's that give a wide range of traits. An index will not be included as our clients level of importance of each trait may differ. Our preferred Index at this stage is MCP+. This index focuses on growth, carcase, and reproduction traits while maintaining mature size. This index also has 5% WEC contribution which suits our program of measurement. The WEC is not part of the BLX index which is one reason for using MCP+.

We are now embarking on the use of genomics to enhance our current ASBV's as well as providing information on eating quality traits. This will enable us to provide more selection pressure on the ewes that are retained in the stud flock. The aim is to take the stud ewes to the highest possible level while maintaining breed purity and excellent breed type.

At Coolawang the ewe lambs that are retained undergo a rigorous selection process. Selection includes the use of ASBV's, raw data and strict adherence to structure and breed type.

Our program does not seek to chase some traits to extremes while ignoring other traits that in a commercial flock have a cost and therefore rely on a percentage of income from the sheep to cover them.

The depth and genetic stability that the ewe flock offers allows us to breed rams with a consistent breed type while still allowing for improved performance into the future.

COOLAWANG BORDER LEICESTER
SELECTED STUD EWES

PLEASE NOTE:

Lots 181 - 198 will be auctioned off after the 8 Stud Rams (Lots 1 - 8)
following feedback from our stud clients.

The ewes will then be followed by the Selected Rams (Lots 9-20) with the Flock Rams to follow.

NOTES

This year 2026 will be the 23rd year that Coolawang has presented 1.5 year old BL X Merino ewes at the Naracoorte first cross ewe sale which brings up 47 years of breeding.

Coolawang began by offering ewes at the then blue ribbon sale at Strathalbyn in 1980 achieving success in price and presentation. The ewes offered at Naracoorte have been equally successful winning blue ribbons for the best presented pen, saleyard top prices as well as several National records.

We believe that strict biosecurity management in conjunction with rigorous animal health practice provides a high level of assurance when offering the property's sheep for sale.

At Coolawang the merino ewe flock is self replacing with the Border Leicester Stud providing rams for the 1st X breeding program.

AI programs in both Merino and Border Leicester sheep provide genetics which will continue to drive productivity in the flock. An advantage of the AI program is that it lessens the need to bring physical sires onto the property thereby enhancing the health status of the flock.

However, the efforts we put into livestock production and the sales that result would not be possible without the continued support of many who purchase our sheep and it is a highlight for us that this happens year in year out. For this we are extremely grateful for everyone on the journey with us.
